

Every week, KIU students miss matches they planned to play.

- **Who:** KIU students playing informal peer-organized sports (football, basketball, futsal, volleyball)
- **7 in 10** of our 10 interviewees missed at least one game last semester due to a buried update
- Average pain intensity **4.0 / 5** across 10 interviews
- **2 KIU sports groups** have already dissolved from logistics fatigue

"I muted the group because it was too noisy. Then I missed the time change. You can't win either way."

— Giorgi, Interview #03

One post. One source of truth. One push when anything changes.

- The organizer posts a match once — sport, time, place, player limit
- Every registered player at their university gets it instantly
- When anything changes, the notification fires automatically — no re-announcement cycle
- The player sees only their own university's matches

**No reposting across three apps.
No checking five chats before you leave the house.**

Push-to-mobile became free, and group chats became unfixable.

The specific change

Free cross-platform mobile push (Expo Push Service) became available to small teams in **early 2024**. Before that, building this required paid notification infrastructure we couldn't afford.

The companion change

Facebook Groups has reduced organic group-post reach since 2023. The "official" announcement channel became measurably less reliable — exactly when people needed it.

\$12K → \$70K → \$840K → \$1.2B

Tier	Users	× Price/yr	= ARR
SOM — KIU only	500 active players	\$2/mo × 12	~ \$12,000
SOM + 3 Tbilisi unis	2,000–4,000 paying	\$2/mo × 12	~ \$70,000
SAM — Georgian unis	~35,000 (8 unis)	\$2/mo × 12	~ \$840,000
TAM — Europe	~50M students	\$2/mo × 12	~ \$1.2B

Built bottom-up from our own data, not an industry report.

UniSport, live now.

A signed-in KIU student sees only KIU matches with live quorum (e.g. 5/10), sport, time, and venue — and joins with one tap. When the organizer changes the time, every joined player gets a push notification automatically.

<https://unisport-412.pages.dev>

Demo'd live during the pitch on the deployed product (two browser windows: player + organizer).

North Star Metric: matches joined per active user per week — tracked in PostHog.

Early, real, and pointing the same direction.

- Launched **4 weeks ago** at a single university, zero marketing spend
- **~18 real signups** on the live product
- Pre-launch smoke test converted real KIU sports-chat traffic into signups before we'd built anything
- **10 customer interviews** at an average pain of **4.0 / 5**

Small numbers, but every one is real and verifiable — one campus, four weeks, no spend.

Free for players. Organizers pay \$2/mo.

Organizer Premium (Phase 2): recurring schedules, match templates, participant history — the features that save an organizer an hour a week.

Metric	Value
Blended CAC	\$0.64
LTV (value proxy)	\$21.38
LTV : CAC	33.4 : 1
Payback	< 1 month
Gross margin	95%

Stress test: halve the lifetime → LTV \$10.69, ratio 16.7:1 — still well above 3:1.

One organizer → 20 players. That's the leverage.

Channel	CAC	Est. acquired (2-wk)
1. Organizer outreach (Messenger DM)	\$0.60	~100 (5 orgs × 20)
2. KIU sports group chats	\$0.50	~60
3. QR posters at facilities	\$1.00	~35 (65% scan→signup)

First 500 users: 25 organizers across KIU + Free Uni + ISU + TSU × 20 players = 500 signups for ~\$300 and 12 weeks.

Every chat app fills the gap by default — that's why the gap exists.

Dimension	Messenger	FB Groups	WhatsApp	Discord	Telegram bots	Sheets	UniSport
Schedules sports matches	2	2	2	2	3	1	5
Push for match changes	1	1	1	2	4	0	5
Single source of truth	1	2	1	3	3	4	5
Zero work from organizer	5	5	5	2	1	2	4
Quorum visibility	0	0	0	1	1	2	4
University-scoped audience	1	2	1	2	1	1	5
Existing adoption at KIU	5	5	4	2	0	1	1

Moat: Switching Costs. Cotne (I-10) built a working Telegram bot — it failed because the organizer wouldn't migrate. Once an organizer builds a roster + history in UniSport, the same stickiness protects us.

Help us leave KIU.

The ask

- **\$25,000** at \$200K pre-money
- **11.1% dilution**

Use of funds

- **\$12K** Engineering (6 mo + native apps)
- **\$8K** 4-university expansion
- **\$5K** GDPR compliance

Milestone — by March 2027

500 active monthly users across 4 universities · 25 paying organizers (\$600/mo MRR) · signed MOU with KIU Sports & Wellness.
