

UniSport

YOUR UNIVERSITY. YOUR MATCHES.

unisport-412.pages.dev

THE PROBLEM

KIU students who play informal campus sports keep missing games — schedule changes get buried in noisy group chats across Messenger, Facebook and WhatsApp. 7 of 10 students we interviewed missed a match last semester; two campus sports groups collapsed from coordination fatigue.

TRACTION

METRIC	VALUE	AS OF
Signups (live product)	≈ 18	11 Jun 2026
Matches joined	[confirm]	11 Jun 2026
Smoke-test signups	[confirm]	13–21 May

33 days · one campus · zero ad spend. Numbers read from the Django admin — confirm exact counts before printing.

THE SOLUTION

UniSport gives each campus one verified feed: an organiser posts a match once, every player at that university sees it, and any change pushes to everyone automatically — no reposting, no buried updates.

BUSINESS MODEL

Free for players. Organisers pay **€5 / month** for automation — recurring schedules, templates, participant history.

CAC	LTV	LTV : CAC	PAYBACK
€1.70	€58	33 : 1	< 1 mo

MARKET — BOTTOM-UP

KIU launch core **€2,000/yr** → 4-campus cluster (TSU · SEU · KIU · BTU) **€8,000–10,000** → all Georgian universities **€100,000–150,000**

Basis: ~25 paying organisers per campus × €5/mo. European expansion potential €1M+.

TEAM

Davit Karoiani · PRODUCT OWNER

Drove the LMS→sports pivot; built signup/auth and organiser match creation; owns the live deployment.

Mariam Tskhomelidze · SCRUM MASTER

Owens the sprint board; ran the smoke test; built the match feed and push notifications.

Mariam Pirtskhalava · DISCOVERY LEAD

Ran 10 customer interviews and synthesis; authored the problem statement and ICP.

Levan Kovziridze · TEST LEAD

Built join-match + confirmation; owns usage tracking via the Django admin and AC verification.

THE ASK

Seeking €67,000 expansion capital — €32,000 engineering · €22,000 four-campus rollout · €13,000 compliance & legal — to reach 4 universities and a formal KIU Sports & Wellness partnership by March 2027.
