I The Problem

KIU students who play informal campus sports keep missing games — schedule changes get buried in noisy group chats.

10/10

interviewees can't trust the schedule

7/10

missed a game last semester

4.0/5

average pain intensity

2

campus sports groups collapsed

"I muted the group because it was too noisy. Then I missed the time change. You can't win either way." — Giorgi, Interview #03

| The Solution

One screen replaces the chaos: the organiser posts a match once, and every change reaches every player automatically.

- Organiser posts a match once — sport, time, venue, player limit.
- Every verified player at that university sees it instantly.
- Time moves, venue changes, game cancelled → an automatic push to everyone who joined.
- No reposting across three apps. No checking five chats before you leave home.

One source of truth

One post. One push when anything changes. You always know where to be.

I Why Now

INFRASTRUCTURE SHIFT

Free cross-platform push notifications (Expo Push) became available to small teams in **early 2024**. Before that, building this required paid infrastructure we couldn't afford.

FEED FRAGMENTATION

Facebook Groups quietly **deprioritised organic posts** since 2023, so the "official" announcement board became unreliable exactly when students needed it.

Our entry: we capture clear, time-sensitive intent precisely when the legacy channels lost viability.

I Market — bottom-up

₾2,000

SOM — KIU launch core (per yr)

₾8–10K

4-campus cluster (TSU·SEU·KIU·BTU)

₾100–150K

SAM — all Georgian universities

€1M+

European expansion (TAM)

Built bottom-up from our own model: ~25 paying organisers per campus × ₾5/month. Players are free — only organisers pay, so the revenue base is organisers, not total users.

| The Product — live now

A signed-in KIU student sees **only KIU matches** with live quorum, sport, time and venue — and joins with one tap. When the organiser changes the time, every joined player gets a push automatically.

Live demo on the deployed product

I Traction

18

real signups

33 days · one campus · £0 ad spend

- **Every signup is organic** — pulled straight from real KIU sports group chats, zero marketing.
- **Pre-launch smoke test** (13–21 May) converted real group-chat traffic into signups before we'd built the product.
- **10 customer interviews** at an average pain of 4.0 / 5 underpin the demand.

All figures read from our own Django admin — verifiable live in Q&A.

I Business Model

Free for players, always. Organisers pay **€5 / month** for the automation that saves them an hour a week.

€1.70	€58	33 : 1	< 1 mo	95%
CAC	LTV	LTV : CAC	Payback	Gross margin

Recurring schedules, match templates, participant history — the organiser features that make leaving costly. Even at half the lifetime, the ratio is still 16 : 1.

I Go-to-Market

One organiser brings their whole group — about 20 players. That's the leverage.

- **Channel 1 — organiser outreach** (Messenger DM),
~£1.6 per acquired user.
- ~80% of an organiser's players follow them in.
- **First 500 users:** 25 organisers × 4 campuses × ~20 players ≈ 500, for ~£800 and 12 weeks.

Why it compounds

We acquire the supply side (organisers) directly and cheaply; the demand side (players) arrives for free with each organiser.

I Competition

DIMENSION (0–5)	MESSENGER	FB GROUPS	WHATSAPP	DISCORD	TELEGRAM BOTS	SHEETS	UNISPORT
Schedules sports matches	2	2	2	2	3	1	5
Push for match changes	1	1	1	2	4	0	5
Single source of truth	1	2	1	3	3	4	5
Zero work from organiser	5	5	5	2	1	2	4
Quorum visibility	0	0	0	1	1	2	4
University-scoped audience	1	2	1	2	1	1	5
Existing adoption at KIU	5	5	4	2	0	1	1

Moat — Switching Costs (Helmer's Seven Powers): once an organiser builds a roster and match history in UniSport, leaving means rebuilding all of it. Cotne (I-10) built a working Telegram bot — it still failed because the organiser wouldn't switch.

| The Ask

Raising ₦67,000 for ~11% (≈ ₦540,000 pre-money).

₦32K

Engineering (6 mo + native apps)

₦22K

4-campus rollout

₦13K

Compliance & legal

Milestones by March 2027: 500 active users across 4 campuses · 25 paying organisers · a signed partnership with the KIU Sports & Wellness office.

Questions?

Let's align university sports schedules transparently.
